

# Working with our Community

ATKINS

Atkins is committed to be a responsible corporate citizen. We are passionate about contributing to the communities in which we operate and engaging our people to join together to make a difference where it matters.

We want to engage our staff, shareholders and the charities we support. We support our communities in two ways:

### **Being a good neighbour**

We will support our people in their own communities around the world through local charitable donations, fundraising, volunteering activities and sports and social events. This can be during the working day or in leisure time.

### **Pro bono consultancy advice**

We will support charities by providing pro bono consultancy advice.

**Keith Clarke**
